

PIG POPPER

PRODUCT CODE: 2500FOC

FORM: Mini Pellet

MEDICATION:

Denagard® (Tiamulin hydrogen fumarate) 35 g/ton

APPLICATION: Designed to express the full genetic potential of elite show pigs. Excellent for growing pigs being prepared for sale at a young age. For the control of swine dysentery associated with Brachyspira (formerly Serpulina or Treponema) susceptible to Tiamulin. Feed continuously as sole ration on premises with a history of swine dysentery but where signs of disease have not yet occurred or following an approved treatment of the disease. Control of porcine proliferative enteropathies (ileitis) associated with Lawsonia intracellularis. Feed continuously as the sole ration for not less than 10 days.

FEEDING DIRECTIONS:

Feed to pigs to produce maximum bloom from 35 lb. to 75 lb. bodyweight. For additional information, please contact your Kalmbach Feeds representative.

FEATURES AND BENEFITS:

- Contains a blend of highly digestible protein sources including spray dried whey, spray dried blood plasma, egg white and soy concentrate.
- Contains an abundant amount of key amino acids for building muscle and achieving “the look” of a sale ready pig.
- Formulated with a high level of key micro nutrients important for building muscle and improving bloom in young pigs.
- Fixed formula that prepares pigs to go on a post-sale diet.

CAUTION: Do not feed undiluted. Do not feed to animals other than swine. The effects of Tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. Use as the only source of Tiamulin. Swine being treated with Tiamulin should not have access to feeds containing polyether ionophores (e.g., Monensin, Lasalocid, Narasin, Salinomycin, and Semduramicin) as adverse reactions may occur. If signs of toxicity occur, discontinue use of medicated feeds.
